PROFILE SUMMARY

Software Engineer with 5 years of experience building backend systems, REST APIs, and mobile applications using Python, FastAPI, Django, and Flutter. Experienced in software automation, asynchronous task processing, cloud deployment, and CI/CD, with tools including Celery, Kubernetes, Shorebird, and Google Workspace. Active technical speaker and developer community contributor, sharing knowledge through talks and workshops on software development, automation, and emerging technologies.

TECHNICAL SKILLS

Languages & Frameworks: Python, FastAPI, Django, Flask, Django REST Framework, JavaScript, Dart, Flutter, React.js, C, C++

Backend & Automation: REST API Design, Celery, API Integration, Webhooks, Workflow Automation

DevOps & Cloud: Docker, Kubernetes, GitLab CI/CD, Jenkins, AWS, Linux, Git, Shorebird

Databases & Data: PostgreSQL, MySQL, Neo4j, Firebase, Elasticsearch, Kibana, Logstash

Web & Mobile Tools: HTML, CSS, Bootstrap, WordPress

Tools & Practices: Google Workspace, Google Apps Script, Gemini API, Scrapy, Playwright, TDD, Unit Testing, Scrum

PROFESSIONAL EXPERIENCE

Software Developer *March 2026 - Present*

FANELIT SARL, Yaoundé, Cameroon

- Develop and maintain backend APIs using FastAPI and Python, integrating React.js and WordPress front ends.
- Manage PostgreSQL databases, including schema design and updates.
- Build Python web-scraping pipelines with Scrapy and Playwright to automate data collection.
- Deploy applications and maintain CI/CD pipelines on Kubernetes clusters using GitLab CI/CD and Docker.
- Perform beta testing of existing features to ensure release quality.

Python Developer *February 2024 - July 2025*

IBaaS Labs SASU, Remote

- Designed a network-monitoring system automating real-time collection of RAM, CPU, and interface metrics using Logstash and Elasticsearch.
- Built a Nautobot plugin to configure monitored devices and auto-generate the corresponding Logstash scripts.
- Implemented a machine-learning-based root-cause analysis system (DoWhy) to pinpoint failure sources in distributed services, reducing diagnosis time from weeks to minutes.
- Wrote Python scripts to automate operational tasks and analyze execution traces.

Backend & Mobile Developer *April 2024 - January 2025*

Surfyn Immo, Remote

- Built and published multiple Flutter/Dart apps (Surfyn, Katika Exchange) on the Play Store, reaching 1,000+ downloads.
- Designed and maintained roughly 50 Python/Scrapy scrapers to automate indexing of real-estate listings.
- Developed backend architecture and AWS-hosted APIs for real-estate property management and search.
- Established comprehensive unit-test coverage to ensure production stability.

Backend Developer *August 2023 - January 2024*

Beacon's Systems, Yaoundé, Cameroon

- Built a Python ERP system for school administration, covering student records, attendance, and scheduling.
- Designed and optimized the database, and developed RESTful APIs with full unit-test coverage.

Freelance Junior Developer *September 2021 - August 2023*

Yaknema Sarl, Yaoundé, Cameroon

- Developed an e-commerce platform for electronics (Django) and its companion Flutter/Dart mobile app.
- Built an ERP for sewing workshops covering inventory and order management, and mentored interns through code reviews.

PROJECTS

- [OIM Bridges](#) - Digital platform for the International Organization for Migration (IOM) helping migrants find jobs, training, and investment opportunities.
- [Kanbati](#) - Site-management platform for construction firms (tasks, attendance, inventory, finances, documents), built for field use and offline availability.
- [Possah](#) - Money-transfer app with 1,000+ Play Store downloads.

EDUCATION

Bachelor's Degree, Computer Science 2019 - 2022

Université de Yaoundé I, Yaoundé, Cameroon

High School Diploma (Baccalauréat), Physical Sciences & Mathematics 2019

Lycée Bilingue d'Etoug-Ebe, Yaoundé, Cameroon

LANGUAGES

- French - Native
- English - Professional Working Proficiency

VOLUNTEER EXPERIENCE

Co-Lead, GDSC UY1 *September 2021 - June 2022*

- Organized technical workshops and tech events for the student developer community.

Executive Member, Computer Science Association (SGA) *September 2021 - June 2023*

- Helped organize coding competitions and the annual university tech day.

Communications Lead, Heaven Voices Choir *January 2025 - Present*

- Manage external communication and social media presence.
